

Dr. Vishal Kattery

Premium Animated Personal Portfolio Website

Version: 2.1 Status: Implementation-ready Theme: Editorial Academic × Human × Premium
× Cinematic

Important: This PRD intentionally contains no YouTube integration, YouTube navigation item, YouTube link, or YouTube content requirement.

This PRD uses the supplied resume as the authoritative source for professional facts. The resume identifies Dr. Vishal Kattery as an academic professional with teaching, research and industry experience, including a Ph.D. in Management, SCOPUS-indexed publications, assistant-professor/visiting-faculty experience, motivational speaking and placement training.

Source of truth for professional chronology and credentials: the uploaded resume. Do not invent missing dates, employers, awards, publications, testimonials, counts or relationships.

1. Product Vision

Create a high-end, story-driven personal portfolio for Dr. Vishal Kattery that presents him not as a conventional résumé page, but as a multidimensional academic, mentor, trainer, researcher and industry-connected professional.

- Editorial academic aesthetic: sophisticated, warm, intelligent and human.
- Premium cinematic motion without racing, gaming, cyberpunk or neon-heavy styling.
- Every animation should reinforce meaning, hierarchy or storytelling.
- Make the site feel like an interactive professional profile rather than a template.
- Default experience is dark mode; a light mode toggle is required.
- Single-page application (SPA-style) with smooth section navigation.
- Responsive from large desktop to mobile and touch devices.

2. Source of Truth & Content Governance

The supplied resume is the primary source for professional facts. It states the profile, work experience, education, organizations, volunteer experience, publications, expertise, membership, subjects handled and training history. [filecite\turn4file0\L2-L11]

- Use exact resume-supported facts and terminology unless copy is shortened for UI.
- Do not fabricate professional claims, employers, awards, publication metrics, testimonials, dates or public-figure relationships.
- If a detail is not supported by the resume or separately supplied source material, leave it out or mark it as pending content.
- Resume chronology must drive the journey/timeline rather than invented dates.
- Preserve publication titles accurately when displayed.

3. Professional Positioning

Primary identity: Dr. Vishal Kattery

Resume positioning: Professor / Mentor / Placement Trainer / Counselor / Banker.

[filecite\turn4file0\L2-L4]

Core profile: academic professional with teaching, research and industry experience across management, commerce, banking and computer applications; Ph.D. in Management; SCOPUS-indexed publications; assistant professor/visiting faculty experience; motivational speaker and placement trainer.

[filecite\turn4file0\L5-L11]

Location: Palakkad, Kerala. Phone: +91 75598 54349. Email: k.vishalnair@gmail.com.

[filecite\turn4file0\L2-L4]

4. Information Architecture / Navigation

- Home
- About
- Expertise
- Journey
- Teaching & Impact
- Speaking
- Engagements
- Recognition / Achievements
- Testimonials
- Research
- Human Side
- Contact

Navigation should remain compact. On desktop, use a refined fixed navigation with active-section indication. On mobile, use a minimal menu/overlay. Do not include YouTube anywhere in the navigation or social list.

5. Smooth Scroll & Page Architecture

- Use smooth scrolling with Lenis or an equivalent lightweight solution.
- Use anchor-aware navigation and active-section state.
- Keep one central requestAnimationFrame ticker for scroll, motion and visual effects where practical.
- Use IntersectionObserver/in-view gating for expensive sections.
- Ensure all sections remain usable if smooth-scroll enhancement is unavailable.
- Respect prefers-reduced-motion.

6. Hero — “More Than a Title”

The hero should immediately communicate academic authority, mentorship, communication and human presence.

- Full viewport opening section.
- Large portrait-led visual composition.
- Primary name: Dr. Vishal Kattery.
- Supporting positioning: Professor / Mentor / Placement Trainer / Counselor / Banker.
- Short profile statement based on the resume.
- Primary CTA: Explore Profile.
- Secondary CTA: Contact / Collaborate.
- Social links: LinkedIn, Instagram and Facebook only, using supplied URLs.
- No YouTube link, icon, placeholder or social slot.

The resume describes the professional profile as combining teaching, research, industry exposure, motivational speaking and placement training. [filecite turn4file0 L5-L11](#)

7. Hero Motion System

- Subtle depth/parallax on portrait layers.
- Text reveal using word/character-level spans.
- Soft background grain/contour movement.
- Elegant entrance/burn/reveal treatment rather than a flashy loading animation.
- Cursor response may be used on desktop.
- Motion should remain restrained on mobile.
- Reduced-motion mode disables parallax, cursor trail and nonessential transitions.

8. About — “Who Is Dr. Vishal?”

Present the person behind the titles. The resume describes a professional committed to student mentoring, research excellence, skill development and career empowerment.

□filecite□turn4file0□L6-L11□

- Profile narrative.
- Academic and industry breadth.
- Mentorship philosophy.
- Career-development orientation.
- Human-centered professional identity.
- Use portrait and supporting classroom/interaction imagery.

9. Expertise — “One Professional. Many Roles.”

Build an interactive expertise matrix from resume-supported domains:

- Management & Commerce — organizational behavior, HR, banking operations, business management.
- Computer Applications & IT — programming, IT-enabled business solutions, AI in business.
- Banking & Finance — cooperative banking, banking operations, financial management, employee stress and commitment in banking.
- Research & Publications — employee stress, organizational commitment, job performance, employee engagement, sustainability, social media impact and AI in e-commerce.
- Training & Mentoring — career counseling, placement training, life skills, communication and soft skills.
- Industry Exposure — banking, HR recruitment and IT programming.

These expertise areas are explicitly listed in the resume. □filecite□turn4file0□L68-L76□

10. Sticky Storytelling System

Use a premium sticky stack for the early narrative sections.

- Each story panel occupies a controlled viewport range.
- Incoming panel becomes primary while previous panel visually recedes.
- Receding panels can scale modestly toward ~0.94 and darken slightly; avoid copying the aggressive reference treatment.
- Keep text readable and maintain strong contrast.
- On mobile, simplify or disable sticky behavior if it harms usability.
- Use spring-based motion rather than large collections of CSS keyframes.

11. Professional Journey — “From Experience to Purpose”

Create a central-rail timeline driven strictly by resume dates.

Resume-supported chronology includes: Programmer at Tata Consultancy Services, 2017–2018; Senior Clerk at Chittur Co-Operative Society, 2018–Present; Visiting Professor/Guest Lecture, Academics/Training, 2019–Present; HR Recruiter, 2022–Present; Director at Telious Technologies Pvt. Ltd., 2023–Present. [filecite]turn4file0[L12-L22]

- Central vertical rail / progress thread.
- Year labels animate into focus.
- Each milestone may use an image plate where an appropriate source asset exists.
- Hover/focus can dim unrelated rows.
- Do not imply that overlapping roles were full-time unless the source says so.
- Use exact role and organization names from the resume.
- On mobile, convert the rail into a clean vertical list.

12. Education

Education should be presented as a visually distinct academic timeline or credential stack.

- PhD in Management — Karpagam Academy of Higher Education, Coimbatore — 2021–2025.
- Master of Commerce (Computer Application) — Bharathiar University, Coimbatore — 2021–2023.
- Higher Diploma in Co-Operation and Business Management — Co-Operative Training College, Palakkad — 2019–2020.
- Master of Business Administration — Bharathiar University, Coimbatore — 2018–2019.
- Diploma in Finance — Centre for Development of Advanced Computing, Govt. of India — 2015–2016.
- Bachelor of Computer Application — AJK College of Arts and Science, Coimbatore — 2014–2017.

Education and dates are taken directly from the supplied resume. [filecite]turn4file0[L23-L35]

13. Teaching & Student Impact

Make teaching a major emotional section rather than a small résumé subsection.

- Use classroom photography and student-interaction photography.
- Highlight the resume-supported 100+ motivational and career-oriented sessions across schools and colleges in South India.
- Show placement training themes: interview skills, group discussions, resume building, career mapping and corporate readiness.
- Show induction/orientation, awareness programs, communication, soft skills, life skills, banking literacy, entrepreneurship and personality development as visual topic cards.
- Include one-to-one and group mentoring as a core impact theme.

The resume explicitly states 100+ motivational/career sessions and lists the training areas above.

[filecite]turn4file0[L85-L105]

14. Speaking & Public Engagement

- Use stage/speaking images as editorial image plates.
- Large statement-led typography.
- Micro-animations on key phrases.
- Support the visual narrative with verified speaking/training content from the resume.
- Do not assign event dates or audiences unless supplied.
- Do not identify unnamed people in photos unless independently confirmed.

15. National / Professional Engagement

Include the supplied 17th Co-operative Congress event material as an evidence-based engagement story.

- Event: 17th Co-operative Congress — New Delhi.
- Participation: invited delegate.
- Organizer: National Co-operative Union of India, Government of India.
- Event material supplied by the user states that the function was inaugurated by Prime Minister Shri Narendra Modi.
- Venue material supplied by the user: Pragati Maidan, Supreme Court Complex, New Delhi.
- Dr. Vishal shared views about youth and the new generation of co-operatives on stage.
- Important: do not claim that he met Narendra Modi or identify any person in the event photographs unless that fact is separately verified.

16. Organizations & Community Involvement

The resume lists the following organizations and volunteer experiences:

- MCE Tuition Centre, Palakkad — Faculty of Computer Science — 2018–Present.
- Zeal Academy, Palakkad — Faculty of Career Counseling, Placement Trainings, Career mapping, Communication and Soft skill development, Life skills Training, Pre & Post Interview preparedness — 2019–Present.
- Commerce Academy, Palakkad — Faculty of Computer Application, Management and Economics — 2022–Present.
- Civil Defence – Kerala Fire Rescue Services, NDMA, KSDMA — Member — 2022–Present.
- Covid-19 Rapid Response Team, ChitturThathamangalam Municipality — Member — 2020–2021.
- Kerala Emergency Team (KET), Palakkad — Member — 2022–Present.

These organizations and volunteer roles are listed in the supplied resume. `□filecite□turn4file0□L37-L51□`

17. Research & Publications

Create a serious academic section with publication cards, topic tags and expandable details.

- Stress of Employees Toward Private Sector Banks With Reference to Palakkad District — International Conference on Recent Research in Management, Accounting and Economics (RRMAE-2024), SCOPUS, pp. 431–438.
- Employee Commitment and Job Performance With Reference to Private Sector Banks in Palakkad District — Frontiers in Health Informatics, SCOPUS, Vol. 13 Issue 6, pp. 261–270.
- Employee Engagement in Terms of Sustainability Issues for SMEs Engaged in Manufacturing Sectors — national-level seminar/contemporary development in entrepreneurship context.
- Impact of Social Media in Business — international conference on influence of social media on business, education and society.
- Significance of AI in E-Commerce — international conference on impact of AI in E-Commerce.

Publication titles and venue details above are derived from the supplied resume.

`filecite[turn4file0]L52-L67`

- Do not add DOI, journal links, citation counts or indexing claims beyond what is provided.
- Allow future publications to be added through structured content.
- Use restrained academic visual treatment rather than generic blog cards.

18. Recognition & Achievements

- Use only achievements explicitly supported by the resume or separately supplied verified material.
- Ph.D. completion may be presented as an academic milestone.
- SCOPUS-indexed publications may be highlighted because the resume explicitly states this.
- Do not create an awards section populated with fabricated awards.
- Achievement visuals may include supplied certificate/ceremony photographs when context is known.

19. Testimonials — Major Section

Testimonials must be data-driven from the supplied Excel template. No testimonial text should be invented.

- Source file: content/testimonials/testimonials.xlsx.
- Required columns: Name and Testimony.
- Optional columns: Student / Faculty and Institution Name.
- Read every row; a row is valid only when Name and Testimony are both non-empty.
- Ignore incomplete rows without breaking the site.
- Preserve supplied testimony wording.
- Never invent a testimonial, person, role or institution.
- Support any number of valid testimonials.
- If zero valid testimonials exist, show a development-only empty state; never use fake testimonials.

19.1 Testimonial UI

- Large quote-led composition.

- One prominent testimonial at a time.
- Progress indicator such as 01/N.
- Previous/next controls.
- Keyboard accessible.
- Mobile-friendly.
- Quote reveal animation with reduced-motion fallback.
- Optional role/institution metadata only when present in the spreadsheet.

20. Human Side

Create a warm, restrained section that shows the person beyond professional labels.

- Family/ceremony imagery may be used where context is supplied.
- Use natural photographs rather than overly polished stock imagery.
- Do not infer private facts or relationships from photographs.
- Keep this section optional if appropriate assets are not suitable.

21. Contact — “Let’s Connect”

- Location: Palakkad, Kerala.
- Phone: +91 75598 54349.
- Email: k.vishalnair@gmail.com.
- LinkedIn, Instagram and Facebook.
- Primary CTA for collaboration / speaking / training / academic engagement.
- Do not include YouTube.

22. Footer

- Dr. Vishal Kattery.
- Short professional positioning line.
- Email and location.
- LinkedIn / Instagram / Facebook only.
- Copyright / legal text as appropriate.
- Subtle animated contour or grain treatment.
- No YouTube.

23. Visual Design System

23.1 Color

- Dark default: near-black charcoal / deep graphite background.
- Primary text: warm white / soft gray.
- Accent: restrained academic blue, muted teal or similarly sophisticated single accent.
- Light mode: warm off-white background with dark graphite typography.
- Avoid aggressive neon cyan, racing red, HUD green or gaming gradients.

23.2 Typography

- Use one strong display face and one highly readable sans-serif.
- Large editorial headlines.
- Compact metadata labels.
- High contrast and generous whitespace.
- Typography should feel academic/editorial rather than corporate-template.

23.3 Imagery

- Prefer supplied authentic photography.
- Use large portrait crops and asymmetric editorial plates.
- Apply subtle grain, monochrome/duotone treatment only where it improves consistency.
- Never distort faces.
- Do not infer dates or identities from filenames.

24. Cursor & Background Motion

- Desktop-only cursor enhancement may include a small trailing dot/ring.
- Background motion should be subtle: grain, contour field, soft light drift or depth.
- Disable or simplify on touch devices.
- Do not let cursor effects interfere with clickable controls or accessibility.

25. Motion Architecture

The motion system should be centralized rather than scattered throughout components.

- One shared requestAnimationFrame loop where practical.
- Lenis/smooth-scroll integration.
- Spring-based interpolation for major transforms.
- Named motion configurations for consistent behavior.
- IntersectionObserver for reveal triggers.
- Scroll progress drives timeline and sticky-stack state.
- Use CSS transitions only for simple state changes/hover feedback.
- Prefer transform/opacity for performance.

- Use will-change selectively, not globally.

26. Text Reveal Engine

- Split display text into words or characters only where needed.
- Animate opacity/transform with a spring-like or eased progression.
- Keep accessible plain text available to assistive technology.
- Do not over-animate body copy.
- Use staggered reveals for hero and section headings.

27. Loading Experience

- Short loading veil with brand name / monogram.
- Progress should be perceived as intentional rather than a fake percentage.
- Do not block the page unnecessarily.
- Fallback cleanly if WebGL or advanced effects are unavailable.
- On slow devices, prioritize content visibility over decorative loading.

28. Responsive Design

- Desktop: full editorial composition, sticky storytelling and layered imagery.
- Tablet: reduce overlapping layers and sticky duration.
- Mobile: prioritize readability, tap targets and vertical narrative.
- Use touch-safe interactions; no hover-only content.
- Reduce image resolution and motion complexity on small screens.
- Ensure navigation remains reachable.
- Use CSS container queries / fluid sizing where beneficial.

29. Accessibility

- Semantic HTML landmarks.
- Keyboard navigation for menus, testimonial controls and interactive cards.
- Visible focus states.
- Meaningful alt text for informative images.
- Decorative images marked appropriately.
- Color contrast suitable for both themes.
- Reduced-motion support.
- Do not rely on animation alone to communicate meaning.

30. Performance

- Lazy-load below-the-fold images.
- Use responsive image sizes and modern formats where possible.
- Lazy-load video only when it adds real value and is supported by the supplied asset.
- Gate heavy effects by visibility.
- Keep WebGL optional, not essential to understanding content.

- Pause off-screen animation loops.
- Minimize third-party dependencies.
- Test on mid-range Windows hardware and mobile devices.

31. Video Asset

The supplied asset set includes a classroom video. If used, it should support the Teaching & Student Impact section.

- Use muted, inline, autoplay only if browser policy permits and only when it improves the story.
- Provide poster image and graceful fallback.
- Do not make video essential to understanding the page.
- Respect reduced-motion and data-saving preferences.
- No YouTube embed or external video platform dependency.

32. Asset Architecture

Recommended project structure:

```
assets/  
  images/  
    hero/  
    portraits/  
    academic/  
    teaching/  
    speaking/  
    students/  
    events/  
    achievements/  
    phd/  
    family/  
    review/  
  video/  
content/  
  testimonials/  
    testimonials.xlsx  
  README.md
```

33. Asset Interpretation Rules

- Use filenames only as hints; verify visual content before assigning meaning.
- Do not infer the identity of people from filenames such as “famous person”.
- Do not infer event dates from file names.
- Use event-specific facts supplied by the user or authoritative source material.
- Use authentic photographs to strengthen narrative sections.
- Keep sensitive/private photographs optional.

34. Resume Integration

- Resume content should populate the professional timeline, education, expertise, publications, organizations, volunteer work and training sections.

- Provide a visible CV/resume download action if the final product includes the PDF asset.
- Do not expose hidden metadata.
- Keep the website copy consistent with the supplied resume unless later updated by the user.

The resume includes work experience, education, organizations, volunteer experience, publications, expertise, membership, subjects handled and training conducted. [filecite\turn4file0\L12-L22\ [filecite\turn4file0\L23-L35\ [filecite\turn4file0\L37-L51\

35. SEO

- Title: Dr. Vishal Kattery | Professor, Mentor & Placement Trainer.
- Meta description based only on verified profile content.
- Open Graph image using the approved hero portrait.
- Structured data may use Person schema with supported fields only.
- Use canonical URL when domain is finalized.
- Meaningful heading hierarchy.

36. Technical Architecture

- Single-page HTML application.
- Pure HTML/CSS/JavaScript preferred.
- Three.js may be used for optional hero depth/parallax/WebGL.
- Lenis or equivalent for smooth scrolling.
- No framework is required unless implementation needs it.
- Centralized motion module.
- Structured content objects for timeline, expertise, publications and testimonials.
- Keep content separate from presentation where practical.
- Build should be deployable as a static site.

37. Content Data Model

Recommended structured data objects:

- siteProfile: name, title, location, email, phone, social links.
- experience[]: role, organization, start, end, description, media.
- education[]: qualification, institution, start, end.
- expertise[]: category, topics.
- publications[]: title, venue, year/details, indexing note.
- organizations[]: organization, role, period, description.
- training[]: category, description, evidence/count where explicitly supported.
- testimonials[]: name, audience, institution, testimony.

38. Definition of Done

- Hero communicates identity within seconds.
- Dark mode is polished and is the default.
- Light mode toggle works and persists preference.
- All main navigation links scroll correctly.
- Professional journey is based on resume chronology.
- Education and expertise match the resume.
- Publications match the resume.

- Training section reflects the resume's 100+ sessions claim accurately.
- Testimonials load from Excel-derived content with no fake entries.
- Contact information is correct.
- LinkedIn, Instagram and Facebook links work.
- No YouTube references exist anywhere in the project.
- Responsive layout works on desktop, tablet and mobile.
- Keyboard navigation works.
- Reduced-motion mode works.
- Performance remains acceptable on mid-range hardware.
- No fabricated professional claims.

39. Creative Direction — Final

The final experience should feel like entering the professional world of Dr. Vishal Kattery: academic authority first, then mentorship, then breadth of experience, then human impact. The visual language should be cinematic but grounded, premium but approachable, animated but purposeful.

Desired emotional sequence:

- Curiosity → “Who is this person?”
- Authority → “He has substantial academic and professional depth.”
- Connection → “He works closely with students and people.”
- Credibility → “His research, training and experience are real and documented.”
- Impact → “His work extends beyond a job title.”
- Trust → “I understand what he does and why it matters.”
- Action → “I want to connect, collaborate, invite or learn more.”

40. Implementation Notes for Codex / Antigravity

- Read this PRD before changing architecture.
- Use the uploaded resume as the factual source of truth.
- Do not invent content to fill empty sections.
- Build the testimonial loader against the agreed Excel schema.
- Keep social links limited to LinkedIn, Instagram and Facebook.
- Remove YouTube from code, content, navigation, footer, SEO, schema, placeholders and data models.
- Treat advanced motion as progressive enhancement.
- Keep all core content accessible without WebGL.
- Before final delivery, run a content audit and a literal project-wide search for the string “YouTube” and remove every occurrence.

41. Reference Motion Principles

The supplied long-form visual reference established a sticky-stack storytelling pattern, a central timeline/progress rail, a shared animation ticker, text-reveal behavior, in-view performance gating and reduced-motion handling. These are adopted only as interaction principles; the visual identity must be

redesigned for Dr. Vishal Kattery. The reference's racing/automotive art direction must not be copied.
